A world leader in serving science

PRODUCT INFORMATION

Catalogue Number: MSD14

Product Name: pBR322 DNA

Size: 50ug (250ul)

Description:

pBR322 is isolated from E.coli strain (dam⁺, dcm⁺). pBR322 is commonly used plasmid cloning vector in E.coli. The molecule is double-stranded circle, 4361 base pairs in length. The molecular weight of pBR322 is 2.83×10^6 daltons pBR322 contains the genes for resistance to ampicillin and tetracycline.

Storage Buffer:

10mM Tris-HCl(pH 7.8), 1mM EDTA.

Concentration: 0.2mg DNA/ml

Storage: -20°C

QF 24 V2.0 11/2011
