# QuantGene 9600

## Real-Time PCR Detection System

Keep absorbing and improving

### Japanese Design Team

Professional BIOER qPCR family appearance design

### APP Adopted

Real time monitoring for easy administration and operation

### Large Touch Screen

Stand-alone operation or upload PC edited programs by USB

### Modular Design

Multiple configuration options and multiple functions added

6-partition independent temperature control

Fully automatic sample cavity

The Window 10 system

Popular 6 channel configuration

Top detection,  
No calibration required

\* All right reserved. Please refer to actual product for true colour representation.

## ► Product Features

### New optical path system

- All new array parallel light source; Improve exciting light effect, intensify fluorescence signal.
- Use independent filter wheels for exciting and emission; No need expand channel for second exciting detection test.
- Adopt cluster conduction design of imported high-end optical fibers, to improve fluorescence signal intensity and reduce photo conduction loss.
- Adopt top imaging technology, takes 1 sec max. for 1 channel detection

### Optical Path system

- Adopt new generation high sensitive CCD
- All new optical design and vision algorithm

### Excellent temp. control and sealing

- Hot-lid
  - Improved temp. uniformity
- Cooling&Heating Block
  - Adopt long life Peltier
  - With 6 independent temp. control zones
  - Adaptable for multiple PCR tubes, strips and plates

BioRT Real Time RT-PCR kit (SYBR Green)

## ► Specification

Product Name	QuantGene 9600					
Model	FQD-96C					
Sample Capacity	0.2ml single tube (transparent cap), 96X0.2(0.1)ml Plate (transparent cap), 8-strip tubes (transparent cap)					
Reaction Volume	10-100µl (96 plate)					
Dynamics Range	1-10 <sup>10</sup> Copies/L					
Excitation Wavelength	300~800nm					
Emission Wavelength	500~800nm					
Block Temp. Range	4-105 °C (Minimum Increment: 0.1°C)					
Temp.Control Mode	BLOCK/TUBE simulation mode					
Temp.Control Tech	Peltier					
Temp. Display Resolution	± 0.15°C					
Temp. Uniformity	≤ ± 0.2°C					
Maximum Heating/Cooling Rate	6°C/s					
Gradient Control Section	6 Independent temp. control zones					
Hot-lid Temp	Range: 30-110°C					
Fluorescence Dyes	F1 FAM, SYBR Green I	F2 VIC, HEX, TET, JOE, TAMRA, CY3, NED	F3 ROX, Texas-Red	F4 Cy5	F5 Cy5.5	F6 For Customized
Power Supply	100-240V, 50/60Hz, 600VA					
Communication Interface	USB adapter (to PC), bluetooth adapter					
Sensitivity	Distinguish 500 and 1000 concentration					
Dimension	380*400*380					
Net Weight	20KG					
Safeguard And Alarm	Hot-lid over heat protection and alarm, switching power supply over heat protection					
Certifications	CE/RoHS
